A	**ड्राइविंग डेस्क (Driving Desk)**			
1	Clean the surfaces of the driver's desk with a soap solution andcloth, taking care not to allow water to enter electrical cubicles.	Check ok	CAB-1 Shurendra Cab#2 पद्यु ठाकुर	Cab#2 पद्यु ठाकुर
2	Clean the dust filter on the buzzer using a soft brush without using the pressure / compressed air.			
3	Ensure that transparent rubber caps provided over the pushbuttons of driver desk.			
4	Clean the battery, OHE and TE/BE meters in both cabs and check for zero error			
5	Check tightness/operation/cable rubbing of connector, earthing of angle transmitter, all rubber gasket and all equipment located on BL and its box frame inside the panel. Clean contacts, check cap and its fitment tightness.			
6	Check tightness of sub D located on BL.			
7	Check ZPT switch located on pneumatic panel.			
8	Check all earthing points located on equipment.			
C	**LIGHTING AND AIRFLOW** **हेड लाइट, कैब व कोरिडोर लाइट,फ्लेशरलाइट,मार्कर लाइट HEAD LIGHT,CAB & CORIDOOR LIGHT, FLASHER LIGHT,MARKER LIGHT**			
1	Check lighting units for physical damage, tightness of fixing connections, particularly look for signs of overheating or burning. Replace bulbs/tubes, which have failed.	Check ok	Cab-1 Shurendra Cab#2 पद्यु ठाकुर	Cab#2 पद्यु ठाकुर
2	Clean all internal light unit diffusers, bulbs or tubes and reflectors.			
3	Clean the glasses of the headlight lamp and marker light.			
4	Ensure that there is no entry of water through head light lamps.			
5	Check for crack or breakage of the aluminum casing of headlight beams.			
6	Check the proper operation of flasher light, marker light (red & white), headlight, cab lights, disc light, m/c. room light.			
7	Check headlight holder and clean glass & reflector. check . tightness of headlight convertor, Ensure sealing			
8	Clean marker light glass and check tightness of connection. Check looseness, flashing in flasher unit.

A	**Master Controller (IC Sch.)**			
1	Calibrate the angle transmitter	IA Sch.	FB Panal. ([illegible])	[illegible]
2	Grease Camshafts. seats under control handles and other moving parts if stiff to operate or dry of lubricant.			
3	Check that the contacts are operating correctly by the camshaft and adjust if necessary.			
4	Check that the rollers are free to rotate and all wiring is sound and secure. Operate handles and ensure interlock functionscorrectly.			
5	Ensure that caps have been provided to cover the auxiliary contacts.			
6	Check the absolute value of transmitter.			
7	Check the tightness of the fasteners & cable connection.			
8	Ensure that schematic numbers of various equipments are intact. To be provided in case of deficiency.			
B	**SB1 & 2, HB1 & 2 AND FB PANEL / CUBICLE**			
1	Check the mounting block of 8.1 and 8.2 contactors by opening side windows and check the main contactor, pre charging contactor foundation bolt tips for looseness and overheating by removing arc-chutes from front side.	Check ok	Cab#2 [illegible] Cab 1 Shantilal	Cab#2 [illegible] FB Panal.
2	Check the condition of capacitors for leakage and check earth fault relay, resistance and discharging resistance for overheating. Check the tightness of all fastener lug, LEM sensor and CTs.			
3	Ensure that the various foundations bolts, body support bolts and supports plates of FB cubicle are intact and tight. Check tightness of cubical doors safety locks.			
4	Ensure tightness of various electrical connections, CBS in SB, HB & FB cubicles.			
5	Check back side of HB cubicle all SB connections for tightness/overheating/cable rubbing.			
6	**IC Sch.: a)** Clean the various equipments fitted inside the SB, HB & FB cubicle.			
	b) Visual examination of various EPCs & EMCs fitted inside FBcubicle and ensure that there is no crackness of cover cylinder, leakage and they are functioning properly.			
	c) Check the tightness of various PCB cards in central electronics.			
	d) Check the RC input filter circuit for any abnormality andmeasure the resistance value.			
	e) Take out the arc-chutes of pre-charging contactors for looseness of strips and ensure tightness of its armature locking nut by hand.			
	f) Check the FB cable junction for tightness, cable rubbing and overheating.

C	**HB CUBICLE :**			
1	Check all equipments' fitment, tightness, intactness of base foundation bolts & body support.			
2	Ensure earthing point/shunts of all panels/cubicles.			
3	Check all MCB cable connections & Siemen connector tightness and no overheating.			
4	Check tightness of 80 A & 150 A contactors connection and condition of tips.	Check OK		
5	Check 1000 V/415 V/110 V transformer connections for overheating and tightness of foundation bolts and checking of fuses for healthy connection.			
6	Check tightness and condition of capacitor, LEM sensor below HB panel, earth fault relay & resistance connection, RLC plate, temperature sensor and all diode boxes.			
7	Checking of OCB cable in HB 1& 2 for overheating cable no.1121, 1122, 1123 (A & B).		मधुसूदन	मधुसूदन
D	**SB CUBICLE:**			
1	Check fasten lug connected on various equipment. Fitment, tightness.			
2	Check intactness of base foundation bolts & body support. Check tightness of cubical doors safety locks.			
3	Check all EMC connector lug position/layout. It should not be touch with plunger.			
4	Visually check the connections on backside of SB 1 & 2 panel for overheating of WAGO connector etc.		Cab#2 Cab 1	Cab#2
5	Check tightness of DC-DC converter 24V/48V and Siemen connector for overheating.			
6	Visually check all pressure switches, tightness of MCB, MCR relay, no voltage relay connections.			
7	Key interlocking: Check all keys are present & the complete system is operational.	Check OK		
8	Ensure the healthiness; Visually check all pre/proper functioning of rotating switch 152,154 and 237.1 on its various locations.			
9	Check visually for any abnormality in SB, HB & FB cubicle			
10	Ensure proper functioning of thermostat of central electronics. **(IC Sch.)**			
E	**MAIN ASSEMBLY BOX-1 & BOX-2:**			
1	Clean the dust of enclosure using vacuum cleaner.			
2	Check the metallic strip provided for spring action in the contact is intact. Replace the contact if required.			
3	Check the connections for 25, 50 & 70 Sq. mm cables for their tightness. **(IC Sch.)**			
4	Tightness of knife contact connection (female), 3-phase choke connection, Power contactor connection. **(IC Sch.)**			

पर्यवेक्षक के हस्ताक्षर **Signature of JE/SSE**

AUXILIARY MACHINES SCHEDULE				
क्र.सं SN	कार्यवाही कार्य /निरीक्षण का विवरण / (शिड्यूल) Detail of Work/ Inspection (schedule)	की गयी कार्यवाही Action Taken	टीसीएन का नाम Name of TCN	हस्ताक्षर/ टिप्पणी Sign/ Remarks
A	**Oil circulating pumps (SR & TFP)**			
	1) Visually examine all SR&TFP oil pumps (Four nos.) for any oil leakage / any abnormal sound and take needful action.			
	2) Check the mechanical support fasteners of all four oil pumps.			
	3) Check and secure rubbing of SR/TFP Cable.			
B	**During schedule check all Auxiliary Blower and Motors: -**			
	1) Check tightness of foundation bolts of all auxiliary motors.			
	2) Visual examination / RDPT of impeller of OCB.			
	3) Check the condition of all flexible hoses connected with variousauxiliary blowers and replace, if required.			
	4) Check tightness of SB and cable connections at terminal box.			
	5) Ensure that the terminal covers of various auxiliary motors are intact and water tight. Special attention needs to be given to main compressor, OCB, TMB motor cable layout and water tightness of its entry point into the motor terminal.	Check ok	Anand Yadav	[illegible]
	6) Clean commutator of CPA motor. Check carbon brush and its holding assembly and replace worn out / defective carbon brushes and associated equipments.			
	7) Check availability of earthing shunt.			
	8) Check condition of cab fan foundation, secure rubbing of wire, and check freeness of fan blade.			
C	**IC Sch.**: Besides of the above Sch. following attention needs to be given: -			
	1) Check the electrical connections of all four oil pumps.			
	2) Check the electrical connections of all auxiliary motors.			
	3) Greasing of all motors with recommended grease or RR-3 Servo Gem Grease ,6 to 7 Stroke ,15 gm.			

Remarks if any: IR 100MΩ

2	Check traction power cables, speed sensor and temperature sensor cables and ensure that they are not chamfered or damaged in any way.			
3	Check Tightness of both end cover bolts of Traction Motor.			
4	Check the intactness of the junction box cover and bolt			
5	Open TM Junction box at body side and check the tightness of connections			
6	Check the condition of bellows and replace if required.			

(B) Sch. IC: TM Schedule & Greasing

क्र.सं. SN	कार्यवाही कार्य /का विवरण निरीक्षण / (शिड्यूल) Detail of Work/ Inspection (schedule)	की गयी कार्यवाही Action Taken	टीसीएन का नाम Name of TCN	हस्ताक्षर/ टिप्पणी Sign/ Remarks
1	Check for intactness of Grease nipple on NDE & DE side. Lubricate the both end bearings using a grease gun with specified grease and send old grease sample to Lab for testing metal content.	Check ok	Anand Indor	[illegible]
2	Check the condition of bearing by seeing the grease, which comes out from grease inlet. Check the condition of grease too.			
3	Send grease sample to Lab for testing metal content, whenever grease available.			
4	Check under truck TM cables for any rubbing against metallic body and secure cables properly.			
5	If applicable following to be check:			
	i) Ensure tightness of all bolts of all Hurth coupling.			
	ii) Check oil level of Hutch coupling and send sample of oil to Laboratory.			
	iii) Check all TM coupling membrane for crack and oil leakages.			
	iv) Clean sleeve and star of Hutch coupling.			
	v) Check and replace bolt if found defective treads of bolts of sleeve and star of Hutch coupling.			
	vi) Check free movement of Hutch coupling.			

Note:- TM#5 Sch Not done as (Axel Jam).

Sachin 23/01/25

Sr.	Details of Work / Inspection (Schedule)	Action Taken	Name of TCN	Sign / Remarks
C	**HARMONIC FILTER**			
1	Examine the roof-mounted resistor for any signs of damage or overheating or presence of foreign materials and clean debris away from the resistor and its insulator			
2	Check and ensure the electrical connections and its tightness.	Checked		
3	Visually inspect the contact tips of contactors for signs of arcingdamage. Repair / replace the defective parts	OK	Rhitwik Lal	
4	Visually inspect the capacitor elements inside the cubicle.checking for signs of damage			
5	Check and Record Capacitor Bank Capacitance Each Capacitor (66.6μF ±5%)	11.04		
6	**(IC Sch)** Blow & Clean the filter resistor and its insulators			
7	**(IC Sch)** Perform functional checks ensuring the main and Aux. Contacts operate correctly			
D	**PROPULSION SYSTEM : TRACTION CONVERTER**			
1	**Check the cable connection of Sichem connectors of differential amplifier provided below SR oil pump**			
2	**Check the condition of silica gel. If pink replace with dried silicagel**			
3	**IC Sch :**			
	a) **Clean resonance circuit capacitor.**			
	b) **Cleaning by Vacuum cleaner**			
	c) **Clean DC link capacitors by blowing after opening side cover. Check that there is no sign of leakage from the capacitors**			
	d) **Clean the isolating blade and spring contact of earthing switch. Lightly lubricate with the specified grease**			
	e) **Check the tightness of SR electronics PCB**			
	f) **Ensure sealing of incoming cable gland of control card rack to avoid dust entry**		Medha Staff	
	g) **Check the ventilation fans of traction converters**			
E	**AUXILIARY CONVERTER 1, 2 & 3**			
1	Visually check the connection of choke and transformer for overheating			
2	Check the tightness of foundation bolts and side supports for crackness, Check tightness of cubical doors safety lock			
3	Clean all dirt and dust deposit. Cleaning is by means of blowing out bushing off with a non- metallic brush or by rubbing with a cloth			
4	Check the tightness of siecem coupler and earthing point			
5	Check all wirings are secured and insulations are not damaged, burnt or eroded. Visually inspect all components for physical damage.			
6	Auxiliary rectifier & Inverter (CG Module &WRE module): check the security of bolted terminals and mechanical mounting of larger components.			
7	**(IC Sch)** Check the contacts of all modules and ensure proper tightness			

F	TRACTION CONVERTER (SR)			
1	Examine all electrical equipment of traction converter for signs of dirt, corrosion, damage etc. Remove all dust/dirt deposits from the connection insulators. Check the tightness of foundation supports and side supports for crackness. Check tightness of cubical doors safety locks			
2	Check the main contactor, pre-charging contactor foundation bolt and tips for looseness and overheating by removing archutes. Check and ensure tightness of pre-charging contactor armature locking nut and strips			
3	Check all connected fast on lug, bus bar connection, CTs, all LEM sensor connections, gate unit connections, pre-charging, MUB and its earth fault resistance, DC link and series resonance capacitor for leakage, tightness and overheating			
4	Check the connection of earth fault relay. DC link sensor and all the earthing point of SR1, SR2		attend by	
5	Check BDV of traction converter oil (in GTO based loco), should be 30KV		Medha	staff
6	Carry out DGA of traction converter oil by C&M Lab (in GTO base loco)			
7	Check the oil level indicator situated on the conservator(Expansion Tank). If the oil is below the minimum mark-top up with the specified oil. Check for any signs of leakage, Range Oil level middle strip +/- 1.5"			
8	Check for any leakage, loose, missing of screw from oil pipe joint, two flange joints, wire braided pipe, valve set vent plug, stoochi coupling, top bottom oil pipe, back body of valve set			
9	SR-1 & SR-2 terminal, if difference of inductance between any two phase is < **0.005mH, allow the motor for next schedule**			
10	If the value is more than 0.005 mH, measure the inductance of individual TM and if difference between two phase of motor is < 0.015mH, allow the motor for next schedule. If > 0.015mH, remove the motor			
11	Check the cable connection of Sichem connectors of differential amplifier provided below SR Oil pump.			
12	Check ventilation fan of Traction converter.
